GitHub | LinkedIn | Medium

PROFESSIONAL SUMMARY

Computer Science graduate with practical experience across full-stack web development, backend engineering, AI/ML applications and networking. Experienced in building web applications using React, JavaScript, Django, Django REST Framework, and Python, with hands-on experience developing REST APIs, authentication systems, database-driven applications, and LAN-based applications. Familiar with AI/ML concepts, LLM and RAG architectures and modern development tools. Strong problem-solving and debugging skills with experience using Git/GitHub, SQL, Docker, Linux, and collaborative software development workflows.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C/C++, SQL
- **Frontend Development:** HTML, CSS, JavaScript, React.js, Vite, Tailwind CSS, Responsive Web Design
- **Backend Development:** Django, Django REST Framework, FastAPI, Flask, REST APIs, Authentication, CRUD Operations, Flask-SocketIO
- **Databases:** PostgreSQL, MySQL, SQLite, Vector Databases
- **AI / LLM Technologies:** LLMs, RAG, LangChain, Azure OpenAI, NLP, Vector Databases
- **Networking & IT Support:** TCP/IP, LAN/WAN, Wi-Fi Configuration, Router Configuration, Hardware and Software Troubleshooting, WebRTC
- **Tools & Development:** Git, GitHub, Docker, Linux, Windows, REST API Testing, Virtual Environments, CI/CD

PROFESSIONAL EXPERIENCE

Lunar I.T. Solution Pvt. Ltd.

Itahari, Nepal

Django Developer Intern

Nov 2025 – Feb 2026

- Developed backend modules and RESTful APIs using Django and Django REST Framework while maintaining reliable and maintainable application functionality.
- Worked with relational databases, development environments, and Linux-based systems to support application development and deployment.
- Diagnosed and resolved software defects through structured debugging and systematic troubleshooting techniques.
- Collaborated with developers using Git workflows and technical documentation to complete development tasks and project milestones efficiently.

SELECTED PROJECTS

LAN Share — Python, Flask-SocketIO, WebRTC

[Code]

- Developed a LAN-based peer-to-peer file-sharing application enabling real-time file transfer without relying on cloud infrastructure.
- Implemented QR-based device pairing, local signaling services, and cross-platform networking using WebRTC and Flask-SocketIO.
- Designed the application around local network communication and troubleshoot connectivity and file-transfer reliability issues.

Institute Management System — React, Django REST Framework, PostgreSQL

[Code]

- Developed a full-stack institute management platform using React for the frontend and Django REST Framework for the backend.
- Implemented features including course creation, instructor registration, student registration, enrollment, attendance, certificate generation, and fee management.
- Integrated REST APIs with the frontend and worked with structured database records to support application workflows.

Expense Tracker API — Django REST Framework, PostgreSQL

[Code]

- Developed a secure REST API for personal expense management using Django REST Framework with token authentication and user authorization.
- Implemented CRUD operations, user-specific data access, currency conversion, and budget monitoring functionality.
- Used Git-based development workflows, database migrations, API testing, and systematic debugging to improve application reliability.

EDUCATION

Tribhuvan University, Central Campus of Technology

Dharan, Nepal

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT)

2022 – 2026
